Thank you, tinyML Strategic Partners, for committing to take tinyML to the next Level, together
Executive Strategic Partners
EDGE IMPULSE

The Leading Development Platform for Edge ML

dgeimpulse.com
Advancing AI research to make efficient AI ubiquitous

Power efficiency
- Model design, compression, quantization, algorithms, efficient hardware, software tool

Personalization
- Continuous learning, contextual, always-on, privacy-preserved, distributed learning

Efficient learning
- Robust learning through minimal data, unsupervised learning, on-device learning

Perception
- Object detection, speech recognition, contextual fusion

Reasoning
- Scene understanding, language understanding, behavior prediction

Action
- Reinforcement learning for decision making

A platform to scale AI across the industry

Qualcomm AI Research is an initiative of Qualcomm Technologies, Inc.

Arm AI Virtual Tech Talks

The latest in AI trends, technologies & best practices from Arm and our Ecosystem Partners.

Demos, code examples, workshops, panel sessions and much more!

Fortnightly Tuesday @ 4pm GMT/8am PT

Find out more: www.arm.com/techtalks
Making Over-the-Air Firmware and ML models Updates Simple and Accessible!

- Securely update your IoT devices regardless of their Hardware Platform (Silicon) Provider and physical location.
- Unlock TinyML business value through OTA Firmware and ML models update.
- Pay-as you-go

Chris Rowen

Chris is a Silicon Valley entrepreneur and technologist, now VP of AI Engineering and Product for Webex Collaboration in Cisco. Most recently he was co-founder and CEO of BabbleLabs, a speech ML company, acquired by Cisco in 2020. Prior to BabbleLabs, Chris served as CTO for Cadence’s IP Group, which he joined after Cadence’s acquisition of Tensilica, the company he founded in 1997 to develop extensible processors. He led Tensilica as CEO and later, CTO, to develop one of the most prolific embedded processor architectures, especially for compute-intensive embedded processing. Chris was a pioneer in developing RISC architecture and helped found MIPS Computer Systems in 1984. He has an MS and PhD in EE from Stanford and a BA in physics from Harvard. He was named an IEEE Fellow in 2015 for his work in development of microprocessor technology.
Chris Rogers

With over 25 years of experience running embedded systems, wireless communications, and algorithm development businesses, Chris has led high caliber teams at companies ranging from Intel to startups. Chris focuses on building and supporting teams capable of bringing cutting edge technologies to reality, delivering results, and customer value quickly. Prior to spinning out SensiML from Intel, Chris was general manager of Intel’s Quark/Curie machine learning software tools business and held prior positions as product line manager turning around Intel’s $750M business in Wi-Fi and Bluetooth modules. An engineer at heart, Chris started his career in automotive test/measurement as both developer and end-user of IoT systems well before the term came into vogue, building bespoke embedded systems for Michelin Tire and then as a consultant to test vendors for GM and Ford. He holds a bachelor’s in Mechanical Engineering and an MBA from Carnegie Mellon’s Tepper School of Business.
